

Jenny

NEW! The Jenny pump is a beautiful balance between soft and hard styles. It is made from sustainable materials: organic cotton fabric, cork (insole), recycled rubber (outsole). The pewter button and buckle, and grosgrain shoe laces are made from recycled materials, too, which makes no pair the same. And, each pair is hand-sewn and assembled by one of Apramps' talented fabricators. **\$75.00**

Jenny's Story: Jenny has been in Spain for just over a year now and is only 16. She never imagined that she would be a prisoner, threatened day and night. At the house she was at, she was a slave... having no money, clothes or documentation to leave. She was given very little food and had to stay up until 5 a.m. every day, trying to get customers.

She fled when she met a customer to whom she told her story. It seems that he had contact with other groups because nine days after she told him her story he returned, she was given a false passport and a ticket back to Spain.

Today, Jenny is going to school part time and working part time in textiles now, but she is concerned about all the other girls that were left behind that still need help. Follow Jenny's story [here](#).
